HERTZ DIGITAL POWER (DPower), FEATURING FOUR CHANNELS DPOWER 4 AND MONO DPOWER 1, IS THE ACCESS GATE TO THE HERTZ SIGNATURE POWER.

ULTRA COMPACT

ULTRA-COMPACT

Excellent for **OEM systems upgrade**, the DPower amplifiers are **ultra-compact** to ensure effortless installations in the increasingly narrow spaces of modern vehicles or in the factory amp area.

HIGH POWER/SIZE RATIO

HIGH POWER/SIZE RATIO

The efficient **D class circuit** delivers **600 W** of maximum power within a compact chassis, an essential requirement for in-car integration.

VERSATILE X-OVER

VERSATILE X-OVER

The **versatile crossover filter** of the **DPower 4** enables the user to create a front-rear or front + subwoofer system by connecting two channels in bridge mode. **DPower1 bass boost function** enhances 45 Hz up to 12 dB to increase **subwoofer** punch.

SPEAKER & RCA INPUTS

SPEAKER & RCA INPUTS

The double **SPEAKER & RCA INPUTS** allows the DPower amplifiers to connect to any type of source, be it OEM or aftermarket.

ART AUTO TURN ON/OFF

ART AUTO TURN-ON/OFF

For an excellent integration with OEM systems the DPower amplifiers are equipped with a smart automated turn on and off circuit according to the factory radio.

HRC BM

The remote control **HRC BM - Bass Management**, optional for DPower 1, **provides the ability to adapt** the subwoofer level (-20 / + 6 dB) to any personal preference and favorite music genre.
